SUMMARY

Full-stack developer with 9+ years professional experience, specialising in user experience, front-end development and user research. As a full-stack developer with a proven history in user experience and interface design, I strive to maintain a UX-centric mindset when developing in order to deliver products of the highest standard, providing a great experience for the end customers. Currently developing using React.js, Typescript with C# Asp.Net frameworks. Originally from Brisbane, Australia with international experience and professional work history across Sweden, Japan and Australia.
